"Heavy chain variable region contribution to the NPb family of antibodies: somatic mutation evident in a gamma 2a variable region."; Cell 24:625-637(1981).
-!- MISCELLANEOUS: The gamma-2a chain mRNA was cloned from a hybridoma making antibodies to the hapten (4-hydroxy-3-nitrophenyl)acetyl
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Mus musculus (Mouse).

Sequence 12, Application US/09903327A;
Patent No. US20020164333A1
GENERAL INFORMATION:
FAPLICANT: Nemerow, Glen R.;
APPLICANT: Li, Erguang
TITLE OF INVENTION: BIFUNCTIONAL MOLECULES AND VECTORS COMPLEXED THEREWITH FOR TARGETE;
TITLE OF INVENTION: DELIVERY
TITLE OF INVENTION: DELIVERY
TITLE OF INVENTION: DELIVERY
CURRENT PPLICATION NUMBER: US/09/903,327A
CURRENT PILING DATE: 2000-07-10
PRIOR REPLICATION NUMBER: 09/613,017
PRIOR FILING DATE: 2000-07-10
NUMBER OF SEQ ID NOS: 33
SOFFWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 12
LENGTH: 510
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          FEATURE:
CTHER INFORMATION: Fusion protein with N-terminal portion of DAV-1 heavy chain
CTHER INFORMATION: and EGF mature peptide
US-09-903-327A-13
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  FEATURE:

GIVE BETOM GIVE

TITLE OF INVENTION: BITUNCTIONAL MOLECULES AND VECTORS COMPLEXED THEREWITH FOR TARGET

TITLE OF INVENTION: DELIVERY

TITLE OF INVENTION: DELIVERY

FILE REPERENCE: 22908-1228

CURRENT APPLICATION NUMBER: US/09/903,327A

CURRENT FILING DATE: 2001-07-10

PRIOR APPLICATION NUMBER: 09/613,017

PRIOR PILING DATE: 2000-07-10

NUMBER OF SEQ ID NOS: 33

SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         61 GKSLEWIGYIYPYKGGTGYNQKFKSKATLTTDSSSNTAYMELRSLTSDASAVYYCARG-- 118

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Pred. No. is the number of results predicted by chance to h
score greater than or equal to the score of the result bein
and is derived by analysis of the total score distribution.

TITLE OF INVENTION: IMMUNOGLOBULINS CONTAINING PROTECTION
PROTEINS IN PLANTS AND THEIR USES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Score 613.5; DB 2; Length 132;
Pred. No. 3e-56;
6; Mismatches 10; Indels 7
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Guy's 13 Gamma 1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             COMPUTER: IBM Compatible
